Four Drawings
Anne Osherson
FIRST EXHIBITION
Miguel Coronado

I.

(portable diptych sundial)
circumscribing
by lines of latitude
muscular sundial
heart cut by angles
of shadows
the hours
I spend eyeing a dead man
sun setting into fractions
as I touch myself to sleep
to self-navigate by magnetic
music
don’t let this country

don’t let this country slice me

further in two
II.

(relief mounted as a mirror frame)
in the tetrahedron
  our faces
  turn from what we can’t have
in equal measure
  the poor utopia
  we long-suffer for
  (inexhaustible
land gouged with goldmines)
  falls apart in the state-of-the-art
  four-dimensional perspective grid
the years our sprawling country
  has spent wanting only enough to feed
  our children what we can’t have
(the light in the library coming down
dusk caught in silver book covers
death’s arithmetic skulking
behind the shelves)
  our faces
turn from what we can’t endure
III.

(astronomical table clock)
iron is moving allegory
box of clock dials
bones in a catacomb
metal and horse fossils
spanning
the labyrinth subsoil of this country
moving bloodwork
and this “music
must happen over time”
for it to mean anything to you
box of wheels turning
bones orbiting
to count the hours
and hunt for neocolonial constellations
a familiar demarcation line
a recognizable face
In the category of what may be termed extinct animals, the Unicorn as a subject for illustrating Printers’ Marks enjoyed a long and extensive popularity. The most remarkable thing in connection with these designs of the Unicorn is perhaps their striking dissimilarity, and as nearly every one of the many artists who employed, for no obvious reasons, this animal in their Printer’s Marks had his own idea of what a Unicorn ought to have been like, the result, viewed as a whole, is not by any means a happy one. Still, several of the examples possess a considerable amount of vigor and have a distinct decorative effectiveness. But apart from this its appearance in the Marks of the old printers is a very striking proof of the fact that the medieval legends died hard. Curiously enough, the proverbial “lion and unicorn” do not often occur together.

The family of printers with whose name the unicorn is almost as closely associated as the compass is with Plantin, is that of Kerver, for it has been employed in over a dozen different forms by one or other members from the end of the fifteenth century to the latter part of the sixteenth. Sometimes there is only one Unicorn on the mark, at others there is a pair. Le Petit Laurens, Paris, was using it contemporaneously with the first Thielman Kerver, and possibly the one copied the other. Sénant, Vivian, Kées, and Pierre Gadoul, Chapelet, and Chavercher, were other Paris printers who used the same idea in their marks before the middle of the sixteenth century. It was long a favorite subject with the Rouen printers, one of the earliest in that city to use it being J. Richard, whose design is particularly original, inasmuch as the shield is supported on one side by a Unicorn, and on the other by a female, possibly intended to represent
B-Dragon dreams of home. Home is a gutter. Before we translate the Korean idiom 개천에서 용 난다 [gaecheoneseo yong nanda] into English, home is but a fill-in-the-blank. From a/the _____ A _____ a/the dragon _____ B _____.

FILL-IN-THE-BLANK WORD BANK:

A. brook stream creek channel gutter sewer
trench conduit spout valley furrow ditch
place water makes a run for it place water takes a piss place water makes way

B. is born is grown is sprouted is manufactured is printed
opens takes flight occurs happens hatches
becomes an idiom becomes known via rumor becomes a product of
becomes a rags to riches story rises above

To and for B-Dragon, home is an idiom.
Sound Exercise for B-Dragon

B-Dragon = ᅇ ᅈ

 HDF as in cost

 썤 HDF as in bbyong! bbyong!
(like the sound of toy laser guns, toy sirens & toy air horns)

 ᅆ HDF ~ as in bbyong~ gada
(like the sound of falling for something suddenly, madly, deeply—for example, a celebrity crush or an ideology)
(like the sound of a tiny “bang” from an ant gun)

 HDF as in ᅇ ᅈ ᅇ ᅇ
as in a toy hammer as in a squeaky hammer as in a crude, blunt gag implement for hitting someone on the head for humorous effect
Bad Images

The poor image is a copy in motion. Its quality is bad, its resolution substandard. As it accelerates, it deteriorates. It is a ghost of an image, a preview, a thumbnail, an errant idea, an itinerant image distributed for free, squeezed through slow digital connections, compressed, reproduced, ripped, reused, as well as copied and pasted into other channels of distribution.18

White Dust From Mongolia Smiles Again
Hua Guang Tse

“The description of the project Cha wrote earlier in 1980, before her trip, indicates that she was intending to make a feature-length film of approximately 100 minutes, her most ambitious film to date…”
—Constance M. Lewallen
